The University of Illinois at Urbana-Champaign was founded in 1867 as one of the original land-grant institutions, created by the Morrill Act which was signed by President Abraham Lincoln in 1862. The university has a long and rich history of cutting-edge research, innovative teaching, and strong public engagement locally, nationally, and internationally. The establishment of the Center for Culturally Responsive Evaluation and Assessment (CREA) is consistent with our mission. CREA is an interdisciplinary center that brings together researchers from across our university, the nation, and the globe to explore and emphasize the role of cultural context in educational interventions while also identifying the conditions and practices that enhance performance for learners irrespective of their educational contexts.

The CREA inaugural conference held in 2013, as well as the CREA 2014 conference, successfully convened a global and interdisciplinary group of scholars, researchers, and practitioners to engage in meaningful discussions focused on the role of culture in evaluation and assessment theory and practice. The CREA 2016 conference will continue this tradition.

On behalf of the University of Illinois at Urbana-Champaign, I welcome you. I hope you have an inspiring and stimulating conference.

Sincerely,

Barbara J. Wilson
Interim Chancellor, University of Illinois at Urbana-Champaign
On behalf of the College of Education at the University of Illinois at Urbana-Champaign, I welcome you to the Third International Conference of the Center for Culturally Responsive Evaluation and Assessment (CREA). The College was pleased to launch CREA in 2011, as it is ever increasingly important to apply an understanding of the character and influences of diverse cultural norms and practices to assessment, evaluation, classroom teaching, counseling, and other educational and school contexts. CREA is establishing a national and international presence as well as new benchmarks in educational research, evaluation, and assessment unique among its peers.

Its goal is to contribute to genuinely enhancing learner performance and well-being. Underpinning an integration into teaching, research, scholarship, and engagement that is relevant to the cultural contexts of educational research, evaluation, and assessment. CREA’s work not only deploys the broad field of education but also harnesses applied fields such as social work, nursing, public health, and STEM-related fields. The Center’s purpose is to encourage and engage in research and practice that is not only culturally sensitive but culturally responsive as well. Culturally sensitive and responsive practices both recognize ethnicity and position culture as central to the research process.

The inaugural CREA conference held in 2013 and the CREA 2014 conference have made major impacts in the field. The conferences draw engaging participants and interested visitors from the U.S. (including a large contingent from Hawaii), Indigenous nations, and nine non-US countries (including Germany, Canada, Ireland, China, Italy, New Zealand, Greece, Australia and Denmark).

I encourage you to take advantage of the various sessions and topics provided by this conference, while particularly taking the opportunity to interact with the broad spectrum of attendees. I look forward to connecting with you throughout the course of the conference. May all participants find the next few days to be a rewarding and enriching experience.

About CREA

The Center for Culturally Responsive Evaluation and Assessment (CREA) was created in 2011 with a primary mission of generating evidence for policymaking that is not only methodologically but also culturally and contextually defensible.

In today’s pluralistic societies it is critically important that research and evaluation studies yield valid and actionable conclusions for the substantive understanding of the nature as well as influences of diverse cultural norms and practices. As a center, CREA brings together an interdisciplinary and international group of researchers and practitioners to address the vital need for policy-relevant studies that foreground findings of cultural and contextual dimensions to more accurately understand the quality and effectiveness of social and educational interventions. CREA serves as a vehicle to engage in rigorous evaluation, assessment, research, practice, and meaningful dialogue relative to our schools and programs that serve those who are poor and/or from culturally diverse backgrounds. Dr. Stafford Hood, Sheila M. Miller Professor of Education and Professor of Curriculum & Instruction and Educational Psychology, directs CREA. CREA is located in the College of Education at the University of Illinois at Urbana-Champaign. Fulfilling its intent to continually expand its international scope and reach, Dublin City University’s School of Education Studies established a sibling CREA office in 2012 directed by Head of School Professor Joe O’Hara and Professor McNamara. Professors O’Hara and McNamara have been in collaboration with Professor Hood in the meaningful incorporation of culturally responsive approaches in evaluation as being vital to address the changing cultural and ethnic context of education in modern day Ireland.

About the College of Education

Founded in 1905, the College of Education at the University of Illinois is dedicated to facilitating and improving the learning process within the context of challenging educational settings, not just within our building or across campus, but throughout the nation and the world. Today the College has four academic departments that serve more than 1600 students: Curriculum and Instruction; Educational Psychology; Education Policy, Organization and Leadership; and Special Education.

All departments offer master’s and doctoral degrees, and Special Education and Curriculum and Instruction offer undergraduate degrees for early childhood and elementary teachers, as well as a secondary education minor. As a top-ranked institution, our breakthrough scholarship addresses many of today’s priorities, and our graduates join more than 34,000 College of Education alumni to become the next generation of teacher leaders and influential professors, administrators, and policy makers.

The Center for Culturally Responsive Evaluation and Assessment (CREA) 2016 Third International conference will once again convene national, international, and indigenous scholars and practitioners to focus on the role of culture in evaluation and assessment. We will take yet another step to advance our thinking (as well as action) about the theory and practice of evaluation and assessment, through a lens of Culturally Responsive Evaluation and Assessment.

We have made a special effort in our third international conference to address the centrality of human attributions, social contexts, diverse perspectives and situational differences in program evaluation and educational assessment. It is the consequence of these variations in culture and identity that also so greatly influence human behavior which require these correlates of human performance to be factored into the calculus of educational assessment and program evaluation. For example, this suggests that the validity of data from any test is, in part, dependent upon these contextual factors that, currently are excluded from consideration as traditional psychometrics have privileged the decontextualization of assessment probes in the interest of objectivity, reliability and validity.

This Third International CREA conference builds on efforts of our 2014 conference in raising our discourse on educational assessment comparably to that of evaluation that has always been prominently present. In this regard, we have included a thread of symposia across each day of the conference that is grounded in work produced by a special National Science Foundation funded project and concerned with the juxtaposition of Diversity, Equity and Excellence in STEM education. This work explores questions related to the implications about the extent culturally relevant assessment can be descriptive, diagnostic, prescriptive and even educative. In this group of papers, we embrace A. Wade Boykin’s thinking for the Gordon Commission on the Future of Assessment, asserting that assessment can do more than measure capacity. Through greater sensitivity to the characteristics of learners, assessment should contribute to the cultivation of capacity.

The mission of CREA and our community remains on generating evidence to inform policy-making that is not only methodologically but also culturally and contextually defensible. The CREA conference is unique in its definitive recognition of culture’s centrality to evaluation and assessment as it intends to illuminate the landscape of culturally responsive evaluation and assessment, a space that remains largely uncharted. As was the case in our inaugural 2013 international conference and our 2014 international conference, the 2016 international conference will bring together an interdisciplinary group of researchers, scholars, and practitioners to inform, listen, and engage each other in this discourse within the context of our social responsibility to make a difference.

With much gratitude,

Stafford Hood

I am delighted to have this opportunity to express my support, and that of the Dublin City University community, for the third annual conference of CREA, the Centre for Culturally Responsive Evaluation and Assessment. The theme of the conference “The Next Generation of Theory and Practice: Rethinking Equity through Culturally Responsive Evaluation and Assessment” has great relevance for all of us who are involved in education in Ireland and Europe today. As many of you are aware, the unprecedented number of individuals seeking asylum within its borders is challenging Europe to address issues of identity, equity and belonging. While clearly a humanitarian challenge of enormous proportions, this reality also impacts our understanding of the role of education within our societies. In this new context, efforts to develop and maintain an equal and inclusive society will demand a fundamental reconceptualization of how we educate current and future generations, at the heart of which will be the linked issues of equity, respect and cultural responsiveness. It is, therefore, timely that CREA is choosing to explore these issues with a view to developing a roadmap to address these fundamental societal challenges.

As DCU enters an historic year in its own development, which will see the establishment of the DCU Institute of Education, the first Faculty of Education in Ireland, it is important that we have an opportunity to draw on the wisdom and insight of the broad community of scholars and practitioners who make up CREA. DCU values the strong links that we have forged with the University of Illinois and recognizes the value of events such as the CREA conference in maintaining and enhancing these connections.

I am delighted that colleagues from DCU’s Centre for Evaluation, Quality and Inspection will be present at the conference and look forward to their bringing ideas and insights back to the wider DCU community. It is my sincere hope that the conference will be a lively, stimulating and challenging event and I hope that we have the opportunity of welcoming you to DCU in the not too distant future.

Welcome from the Annie E. Casey Foundation

On behalf of the Annie E. Casey Foundation (AECF), I welcome you to the Center for Culturally Responsive Evaluation and Assessment (CREA) Third International Conference. We are pleased to support the CREA conference, and commend CREA for continuing to bring inspired scholars and practitioners from across the U.S. and the globe together for critical learning and dialogue. This extraordinary conference provides a venue for participants to network, strengthen skill sets, and affirm their commitment to culturally sensitive and culturally responsive research that impacts the communities we serve.

AECF has a long-standing commitment to research and practice that addresses inequality and disparities. CREA’s core mission and the remarkable CREA conference goals align with AECF’s Foundation-wide directive to incorporate race equity and inclusion into all aspects of our work. In 2014, our Research, Evaluation, and Learning (REAL) unit launched the Expanding the Bench (ETB) initiative. The goal of this effort is to increase the number of historically under-represented researchers and evaluators of color. ETB uses a three-pronged approach: strengthening ties, building capacity and increasing field demand. ETB initiated its work by identifying and promoting the work of independent evaluators and small evaluation firms led by people of color through our Advancing Collaborative Evaluation database. In our building capacity work, we recently launched Leaders in Equitable Evaluation and Diversity (LEEAD), an online evaluation training program informed by many of the theory, research, and practices of participatory and empowerment evaluation. We work to increase field demand by partnering with other funders and allies in promoting the importance of diversity in the field and in the science of evaluation.

We are pleased to partner with the CREA Conference and are confident that the conference sessions and workshops will inform your work as well, ultimately to advance our collective goals to achieve greater social equity.

We are so grateful for the leadership of and partnership with Dr. Stafford Hood, my colleague and Director of CREA and Professor of Curriculum & Instruction and Educational Psychology at the University of Illinois at Urbana-Champaign. We also thank the CREA staff, planning committee, Research Assistants and volunteers for their tireless work in making this conference possible.

Finally, we are pleased to join other funders supporting this important conference and appreciate their contributions to this effort. On behalf of our President and CEO, Patrick McCarthy, Debra Joy Perez, Senior Vice President for Research, Evaluation, and Learning and myself, welcome!

To your success,

Kantahyanee W. Murray, Ph.D.

CREA Acknowledgments and Sponsors

We begin by once again expressing our sincere gratitude to the College of Education at Illinois for its financial, intellectual, and moral support since the establishment of CREA in 2011. Since that time the College has provided consistent encouragement and support for our collective vision for CREA as a community of scholars in the College of Education, across the United States (including Hawaii), internationally (particularly Ireland and New Zealand), and Indigenous nations. We offer a special thanks to Dean Mary Kalantzis who has provided her unwavering support since CREA’s inception. Thank you again, Mary!

It is also critically important that we acknowledge the contributions from the CREA Core Personnel at UIUC, CREA Affiliated Researchers, and the other strongly committed members of the CREA family whose scholarly work, practice, leadership, and tireless efforts continue to support the core mission in substantive ways. You know who you are. We are indeed proud that CREA’s home is the University of Illinois, but at each opportunity, the reminder that the Center belongs to us all must be acknowledged in a loud voice. This Third International conference is one more step in our journey as we grow as a CREA community that must serve as a vehicle for us to continually illuminate the still largely unchartered landscape of culturally responsive evaluation and assessment. Thank you all once again.

Sponsors and Affiliated Groups

CREA would like to first thank CREA’s partner for CREA III 2016, Professor Edmund W. Gordon and his Diversity, Equity and Excellence in Achievement & Assessment in STEM Education Project. His multi-dimensional support, guidance, and pulling together a group of stellar scholars from the Gordon Commission has made an incredible contribution.

Also, a very special thanks must be extended to the Annie E. Casey Foundation for its significant support to make this year’s conference possible.

Of course, special mention to our neighbors, friends, and supporters, the Chicagoland Evaluation Association.

Third International Conference Team

The most thanks goes to the CREA Third International Conference Team. They are the ones responsible for the outstanding planning, coordination, and simply making this Third International conference happen. They have gone far beyond what we could have imagined based on the challenges they have faced. Special note of thanks goes out to Shirley Berbaum and Andrea Fierro for their management and operational planning for all the conference details. To the CREA Graduate Research Assistants (past and present) Dominic Combs, Mai Hoang, Derek Houston, and Leah Peoples, why contributed beyond the call of duty when it was just us manning this ship and with Joe Cross joining us a bit later to also make major contributions. Thank you all!

Third International Conference Planning Committee

We would also like to thank the Third International Conference Planning Committee for their thoughtful input, support, review of proposals and attentiveness to our following the appropriate protocols for the Indigenous members of our community.

Sharon Nelson-Barber, WestED (Honolulu, Hawaii)
Fiona Cram, Katoa Ltd. (Auckland, New Zealand)
Joan LaFrance, Mekinak Consulting (Seattle, Washington)
Joe O’Hara, Dublin City University/CREA-Dublin (Dublin, Ireland)

Finally, thanks to our CREA Core Personnel colleagues: Kevin Franklin, Jennifer Greene, Katherine Ryan, William Trent, Thomas Schwandt, Rosa Milagros Santos and Eboni Zamoni-Gallaher. Thanks for always being there with a helping hand or much needed brainpower.

With much gratitude,

Stafford Hood
Director, CREA
“The Next Generation of Theory and Practice: Rethinking Equity through Culturally Responsive Evaluation and Assessment”

The Center for Culturally Responsive Evaluation and Assessment (CREA) 2016 Third International Conference will bring together national, international, and indigenous scholars and practitioners to focus on the role of culture in evaluation and assessment. This conference will take yet another step to advance our thinking as well as action about the theory and practice of evaluation and assessment; viewed through a lens of Culturally Responsive Evaluation and Assessment.

CREA continues to engage aggressively its mission to generate evidence for policy-making; evidence that is not only methodologically but also culturally and contextually defensible. Our interdisciplinary community of U.S. and international scholars are not only committed to studying this fundamental mission, but also how we might take action.

The CREA conference is unique in its definitive recognition of culture's centrality to evaluation and assessment; and continues to illuminate the landscape of culturally responsive evaluation and assessment -- a space that remains largely uncharted.

Sessions will focus on:

- Broadening participation in STEM and beyond
- Building capacity in global and local communities and neighborhoods
- Developing equitable measures, methods and metrics
- Examining policies and practices of influence and consequence

  - **Presenter:**
    - **Katrina L. Bledsoe,** Ph.D. (Senior Research Director and Founding Director, ThinkShift)
Katrina Bledsoe, Ph.D.
(Senior Research Director and Founding Director, ThinkShift)

Dr. Bledsoe is a senior research director at the Kansas City, Missouri-based DeBruce Foundation responsible for starting ThinkShift, a research and social innovation institute focused on community, economic, and education development. Dr. Bledsoe received her doctoral degree from Claremont Graduate University in Psychology with a concentration in Applied Social Psychology and Specialization in Evaluation Research. Prior to arriving to the DeBruce Foundation, she was a research scientist and senior evaluation specialist at Education Development Center (EDC) in Washington, DC. Dr. Bledsoe is a trained evaluator, mixed methodologist, and social psychologist with 20 years of evaluation experience at the local, state, and federal government levels. Her expertise is in community-based education and social services program evaluation, mixed methodology and methods, applied social psychology, and cultural contexts. Dr. Bledsoe has served as principal investigator, co-principal investigator, or project director, on a variety of projects, ranging from education to school-based health and mental health. She is also a consultant to agencies such as the Office of Juvenile Justice and Delinquency Prevention, the National Science Foundation and to schools, universities, and community-based organizations.

Dr. Bledsoe is the author of chapters, articles, and blogs focusing on evaluation practice, mixed methodology and evaluation, as well as cultural responsiveness in evaluation, social psychology, and other topics. Dr. Bledsoe is the 2013 winner of the American Evaluation Association’s (AEA) Multiethnic Issues in Evaluation Topical Interest Group’s Scholar Award.

Nicole Bowman
(Mohican/Munsee), Ph.D. (President / Founder of Bowman Performance Consulting (BPC) based in Shawano, Wisconsin)

Nicole Bowman is a Ph.D. candidate in the Department of Educational Leadership and Policy Analysis at the University of Wisconsin-Madison. For her dissertation, she is conducting research related to multi-jurisdictional policy formation and impact study with American Indian students and government and public policy agencies (local, state, and federal). She is also President of Bowman Performance Consulting, LLC.

Bowman Performance Consulting (BPC) is a professional consulting and scientific research & evaluation company. Located in Shawano, Wisconsin, BPC provides services to a national clientele from the public, private, non-profit and tribal sectors. BPC gathers measurable and meaningful data from clients and their stakeholders/customers so that individuals, programs, and organizations can use the data, improve performance, and build capacity from our value-added services in order to function more efficiently and effectively for the short and long-term. BPC services fall under four main categories: research, development, implementation, and evaluation.

Fiona Cram
(Maori/NgatiKahungunu) Ph.D. (Katoa Ltd., Aotearoa New Zealand)

Dr. Cram is from Aotearoa, New Zealand and has Maori/Indigenous tribal connections with Ngati Pahauwera. Fiona has a Ph.D. from the University of Otago (Social and Developmental Psychology), and over 20 years research and evaluation experience. Currently, she is the Director of Katoa Ltd, a research and evaluation company. She is involved in a wide range of Kaupapa Maori (by Maori, for Maori) research and evaluation with Iwi (tribal) and Maori (Indigenous New Zealanders) groups, philanthropic organisations, District Health Boards, and government agencies.
Her interests include Maori health and wellness, research and evaluation methods and ethics, organisational capacity development, and Maori decision-making about new technologies. In 2010, she was guest editor of a special edition of the MAI Review journal on methods for researching with whanau (Maori family) collectives. In 2012, she co-edited, with Donna Mertens and Bagele Chilisa, a forthcoming anthology of Indigenous researcher stories of how they became researchers and evaluators. In 2011, she led the evaluation of the Kaitoko Whanau initiative, which is a social service navigator service for vulnerable Maori families. She also evaluated a Vulnerable Pregnant Women’s Multidisciplinary Team initiative run by one of their District Health Boards.

Currently, she is the principle advisor on the Whanau Ora (family wellness) action research initiative, in which Maori and Pacific action researchers are working alongside NGOs that provide holistic services to Maori and Pasifika families. She is also working with a team of researchers at the University of Otago on a study of the health journeys of young pregnant Maori women. This is leading into an intervention trial.

Dr. Fashola is an Adjunct Research Scientist at the Johns Hopkins University and Principal Research Scientist and Vice President, Mathematics Education Research Associates, MERA. She received her Ph.D. in 1995 from the University of California, Santa Barbara. Her research interests include reading, after-school programs, language development, emergent literacy, program evaluation, educational policy issues, problem solving, school-wide reform, and bilingual education. She has authored and co-authored numerous articles, chapters, and reports on these topics, including Show Me the Evidence! Proven and Promising Programs for America’s Schools, Review of Extended-Day and After-School Programs and their Effectiveness, Building Effective After-School Programs, and Effective Programs for Latino Students.

Dr. Goodyear has 20 years of experience evaluating educational projects and programs at local, regional, national, and international levels. She has conducted evaluations and evaluation capacity building in formal and informal educational settings, afterschool, youth civic engagement, HIV prevention, youth development, and human services programs, with a recent focus on STEM educational programs in informal settings.

Currently, as Principal Research Scientist at EDC, she serves as the PI for multi-year evaluations of the NSF Broadening Participation in Computing–Alliances Program, the Statewide Evaluation of the Illinois 21st Century Community Learning Centers Program, and the Teen Science Café Network. From 2009 to 2012, she took a leave from EDC to serve as a Program Officer at the National Science Foundation where she administered grants in the programs of the Division of Research on Learning, including ITEST, Informal Science Education, Promoting Research and Innovation in Methodologies for Evaluation, and CAREER; supervising evaluation and research contracts; and developed directorate and division level evaluation policy.

All the projects and programs that Leslie evaluates are targeted at broadening participation of underrepresented groups. Dr. Goodyear is invested in ensuring that evaluation approaches and techniques are responsive to the culture and context of programs and the people they serve.

Dr. Hopson is a Professor in the College of Education and Human Development at George Mason University. Previously, he served as Professor in the Department of Educational Foundations and Leadership in the School of Education at Duquesne University. He received his Ph.D. from the Curry School of Education at the University of Virginia. He has also done post-doctoral/sabbatical studies in the Faculty of Education at the University of Namibia, the Johns Hopkins Bloomberg School of Public Health and Centre of African Studies at Cambridge University.

Hopson currently or recently served on the editorial boards of several publications related to evaluation, including New Directions...

Dr. Kirkhart holds a Ph.D. in Social Work and Psychology from the University of Michigan and is currently Professor in the School of Social Work at Syracuse University. She served as President of the American Evaluation Association in 1994 and has held a number of leadership roles in that organization. Dr. Kirkhart's work on multicultural validity seeks to bring issues of culture competence to the center of the evaluation profession by placing them squarely in the middle of validity theory. Her work on evaluation influence recasts use more broadly in terms of both scope and intention and calls for closer examination of the consequences of evaluators' work. Dr. Kirkhart's contributions to the evaluation profession have been recognized by the American Evaluation Association (AEA) with the Paul F. Lazarsfeld Award for Outstanding Contribution to Evaluation Theory and the Robert Ingle Award for Outstanding Services to the AEA. She collaborated with the American Indian Higher Education Consortium (AIHEC) in their development of an Indigenous Evaluation Framework and was a member of the writing team for the AEA Public Statement on Cultural Competence in Evaluation. She has partnered with Rodney Hopson to present a workshop on Strengthening Evaluation through Cultural Relevance and Cultural Competence at the AEA/CDC Summer Institute for the past seven years. Recent and forthcoming publications include a coauthored chapter on Equity-focused evaluation with Rodney K. Hopson and Katrina Bledsoe, an article in New Directions on the centrality of context in evaluation, co-authored with Joan LaFrance and Richard Nichols, and a chapter honoring Scriven's Key Evaluation Checklist in a forthcoming book edited by Stewart Donaldson.

Dr. Silverstein is Associate Director at Westat and has provided evaluation and technical assistance services at the Federal, state, and local levels. His evaluation work has focused on assessing the implementation and impact of efforts to expand access to the Internet and other technologies, examining the relationship between learning technologies and student achievement, and studying Federal, state, and local efforts to broaden participation. His technical assistance work has focused on helping stakeholders develop logic models and identify performance indicators. He has also developed performance monitoring systems for a wide range of educational initiatives.

Manulani Aluli-Meyer, Ed. D.  
International Indigenous Scholar-Practitioner at the University of Hawaii at West Oahu, PIKO Community Liaison

Manulani Aluli-Meyer is the fifth daughter of Emma Aluli and Harry Meyer. Her family hails from Mokapu, Kailua, Wailuku, Hilo and Kohala on the islands of Oahu, Maui and Moku O Keawe. The Aluliohana is a large and diverse group of scholar-activists who have spent their lives in Hawaiian education, justice, land reclamation, health, cultural revitalization, arts education, prison reform, transformational economics, food sovereignty, Hawaiian philosophy and most of all, music.

Manu works in the field of indigenous epistemology and its role in worldwide awakening. Professor Aluli-Meyer obtained her doctorate from Harvard (Ed.D. 1998) by studying Hawaiian epistemology via language, history, and the clear insights of Hawaiian mentors. She is a worldwide keynote speaker and has published extensively on the topic of native intelligence and its synergistic linkages to quantum sciences, transformational evaluation practices, and to liberating pedagogy. Her book: Hōōulu: Our Time of Becoming – Hawaiian Epistemology and Early Writings, is in its third printing. Her background is in wilderness education, experiential learning and ecological literacy, and she has been an Instructor for the Outward Bound schools, Wilderness Hawaii, Hawaii Bound, and other alternative learning programs. Dr. Aluli-Meyer championed the Hawaiian Charter School movement in Hawaii, worked within the prisons, and developed Hœa Ea and Kaiao Garden for the Hawaii Island Food Sovereignty movement. Professor Aluli-Meyer was the International Indigenous Scholar in 2005-06 at NgāPae o teMāramatanga, the Center for Māori Research Excellence at the University of Auckland. She is an international evaluator of Indigenous PhDs and is mentored with the lessons learned.

Dr. Aluli-Meyer has been an Associate Professor of Education at the University of Hawaii in Hilo and host to many creative community transformational education projects within/outside the university. She has just completed 5 years in New Zealand working for TeWānanga o Aotearoa as lead developer/teacher for their Masters of Applied Indigenous Knowledge, He Waka Hiringa. She is currently working at the University of Hawaii at West Oahu within their Title III Grant on creating cultural Learning Communities with faculty and staff. Manu is also a wahinekalaipohaku - stone carver - and a recluse living in a public sphere who is passionate about hōōonoponono – family healing method - and its role in planetary awakening. Hōoolalahui o Hawaiinuiakea.

Alfredo Artiles, Ph.D.  
Ryan C. Harris Professor of Special Education and Associate Dean of Academic Affairs at Arizona State University’s Mary Lou Fulton Teachers College

Dr. Artiles is the Ryan C. Harris Professor of Special Education and Associate Dean of Academic Affairs at Arizona State University’s Mary Lou Fulton Teachers College. He is an affiliated faculty in the ASU School of Transborder Studies and the School of Social Transformation. His scholarship focuses on understanding and addressing educational inequities related to the intersections of disability with sociocultural differences. He directs the Equity Alliance, co-edits the International Multilingual Research Journal (Taylor & Francis) and Teacher College Press’ book series Disability, Culture, & Equity.

Dr. Artiles was Vice President of the American Educational Research Association (AERA) (2009-2011), is an AERA Fellow, a Spencer Foundation/National Academy of Education Postdoctoral Fellow (1998-2000), and a 2008-09 Resident Fellow at the Center for Advanced Study in the Behavioral Sciences (Stanford University). He received the 2012 Palmer O. Johnson Award from AERA. Dr. Artiles has held visiting professorships at Leibniz University (Germany), the University of Göteborgs (Sweden), University of Birmingham (UK), and Universidad Rafael Landivar (Guatemala). He is a Commissioner in President Obama’s Advisory Commission on Educational Excellence for Hispanics.

He was named 2009 Distinguished Alumnus by the University of Virginia’s Curry School of Education Foundation. Recent publications include Inclusive education: Examining equity on five continents and was published by Harvard Education Press (2011, with Kozleski & Waitoller).
Lloyd Bond, Ph.D.
Retired, Senior Research Scientist, Carnegie Endowment for the Advancement of Teaching

Lloyd Bond (Ph. D., 1976, Psychology/ Psychometrics, The Johns Hopkins University) is currently a retired (2008) Senior Scholar with the Carnegie Foundation for the Advancement of Teaching in Stanford California and Emeritus Professor of Educational Research Methodology at the University of North Carolina, Greensboro. From 2002 to 2008, he was a Senior Scholar at Carnegie working in the area of assessment across several Carnegie Foundation programs. Dr. Bond taught test theory and psychometrics at the University of Pittsburgh from 1976 to 1988, and at the University of North Carolina (Greensboro) from 1988 to 2002.

Dr. Bond has published widely in the area of assessment, measurement theory, and testing policy and has made fundamental contributions to the measurement of teaching performance and to the literature on measures of quantitative reasoning. He has held editorial positions on the leading journals in educational and psychological measurement and serves on numerous commissions and panels devoted to testing and testing policy. Professor Bond, with Professor Richard M. Jaeger, co-directed the team of measurement specialists that performed all of the preliminary psychometric analyses to assure the technical measurement quality of the assessments of the National Board for Professional Teaching Standards. He was a member of two prior AERA/APA/NCME committees to revise the Standards for Educational and Psychological Testing, and is currently a member of the Design and Analysis Committee of the National Assessment of Educational Progress (NAEP).

A fellow of both The American Psychological Association and the American Educational Research Association (AERA), Professor Bond is the recipient of numerous honors and awards, including the Presidential Citation from AERA for Contributions to Educational Measurement.

The new K-8 charter school in the Chicago neighborhood where Dr. Bond grew up was recently named in his honor.
